

Personnel using hazardous work equipment must have basic knowledge within HSE, Rules and Regulations, Roles and Responsibilities. Work related injuries cost billions of kroner every single year, thus a systematic approach when working with Health Safety and Environment might be the best investment a company can do.

Target audiences

Everybody requiring documented safety training in use of hazardous work equipment.

Contents

- Use of Work Equipment
- Work areas and requirements to personnel
- Risk Assessment
- HSE, accidents and responsibility
- Direct and underlying causes of accidents
- Applicable laws and regulations
- Exercises
- Final exam
